Sodexo’s Corporate Services business delivers workplace services, facilities management and food services to some of the world’s most recognisable brands.

Its teams have expertise operating across a range of different environments in the corporate sector, including headquarters, regional offices, data centres, manufacturing centres and research and development hubs, in sectors as diverse as professional services, financial services, pharmaceuticals, media and technology.
Food services play an important role in creating workplaces which inspire, engage and ultimately improve the productivity of the workforce; optimising employees’ health and wellbeing, and creating vibrant areas for employees to not only eat, but socialise and collaborate with colleagues.

At Sodexo, we are passionate believers in the human-centred and experience-based workplace, where individual talents are realised, where people can invent, inspire, lead and learn. We’re helping organisations be more competitive by finding the sweet spot between intelligent space strategy and services that support life for adults at work.

Sodexo is combining its expertise in integrated facilities management with workplace strategy and experience design to look at all aspects of the workplace, within the walls of the physical space and beyond. With soft and hard FM services at our core, our broader workplace solutions include workplace and technology strategy; space planning, analytics and design; smart buildings; energy management; guest services; concierge; benefits and rewards; health and wellness; and food which come together and are enabled by technology to create more coherent and immersive workplaces that make employees’ lives easier, safer, happier and healthier.

At Sodexo, we seek to improve the quality of life of individuals at work to positively impact organisations’ performance; helping attract and retain the best talent, deliver a great employee experience, improve wellbeing and enhance operational efficiency.
